Forecast for Wednesday 29 May 2024

Weather: Cloudy with sunny spells, lengthiest in the afternoon. Mainly dry at first with a low risk of isolated showers, these most likely during the middle of the day. Largely dry by the evening with sunny spells.

Chance of cloud-free hill tops above 600m: 40% west, 60-70% east becoming >95% by the afternoon. 50% north in the late evening.

Low cloud and visibility: Periods of cloud above 400-600m until mid-morning, lowest in the west. Becoming patchy above 800m during the afternoon, mainly in association with any showers. Risk of northern summits above 600m in cloud from late evening. Generally very good visibility but locally very poor in cloud and moderate in any showers.
